mOne Pro

400 sq.ft. One-Bedroom

**Solar-Powered
Self-Sustainable Home**

Freedom Delivered.

This autonomous home does not require a connection to a power grid and can run all systems, including heating and AC, water boiler, home appliances, using only solar energy and batteries. In any weather, 24/7.

This home can optionally be equipped with an Atmospheric Water Generation System and can generate its own water for all needs. This home can be installed anywhere on this planet without infrastructure and site preparation.

mOne Pro Includes all base mOne systems, plus:

- consumes up to 90% less energy compared to traditional construction technologies
- LiFePO4 Batteries (10 years warranty)
- Off-the-Grid Autonomous Power System
- Patented Extra-Efficient composite structure insulation
- Patented 10-inch Krypton-argon Windows
- Proprietary Remote Power Management
- Proprietary Self-Diagnostics Systems
- Satellite Internet

Optional Add-Ons:

- up to 100 kWh Battery Upgrade
- Atmospheric water Generation System
- hi-end Home Theater System
- Custom colors and interior materials
- up to 10 years extended Warranty

Made in California, designed in Germany
